EDUCATION

Ahmedabad University

B.Tech in Computer Science and Engineering (CGPA: 3.75 / 4.00)

Aug 2023 – May 2027

Ahmedabad, Gujarat

– **Coursework:** Data Structures, Design and Analysis of Algorithms, Computer Architecture, Operating Systems

Gujarat Secondary & Higher Secondary Education Board (GSEB)

HSC (Science) – 91.84% (*District Topper*)

May 2023

Gujarat

WORK EXPERIENCE

Teaching Assistant – Digital Logic & HDL

Ahmedabad University

Aug 2025 – Nov 2025

- Conducted weekly lab sessions on combinational and sequential circuit design using Logisim and Verilog HDL.
- Resolved in-class doubts regarding K-maps, Boolean algebra, and FSM design and evaluated weekly lab reports.

Web Development Intern

MICA University

Jun 2025 – Jul 2025

Ahmedabad, Gujarat

- Developed an interactive web-based simulation platform for students prompt evaluation through professor dashboard.
- Implemented real-time multi-user synchronization using Firebase Firestore and structured evaluation workflows.

Freelance Web Developer

Client: AI Portfolio Platform

Jun 2025 – Jul 2025

Remote

- Built a responsive portfolio platform using React.js and Tailwind CSS with optimized UI performance.
- Automated CI/CD deployment using GitHub Actions and Firebase Hosting for seamless production releases.

PROJECTS

Real World Asset Tokenization using Blockchain | Solidity, ERC-721, IPFS

Feb 2026 – Mar 2026

- Built an Ethereum-based NFT framework to tokenize real-world assets with role-based verification and ownership transfer.
- Integrated IPFS document storage (Pinata) and developed a React-based frontend using MetaMask transactions.

Planetary Exploration Rover – Hybrid AI Navigation | Python, A*, Heuristics

Aug 2025 – Nov 2025

- Designed a hybrid AI architecture combining reactive hazard avoidance with deliberative A* planning for goal-driven navigation.
- Implemented heuristic optimization (Manhattan, Chebyshev, Weighted Euclidean) and memory-based loop prevention.
- Built a battery-aware decision system enabling long-horizon planning under uncertain terrain conditions.

Personalized Fitness Tracker | Oracle DB, PL/SQL, Flask, REST API

Jan 2026 – Feb 2026

- Built a full-stack database-driven fitness tracking system (Group of 4) using Oracle Database XE including workouts, meals, sleep, goals, and recommendations.
- Designed ER model and normalized schema up to 3NF; implemented sequences, explicit PL/SQL cursors, 5 views, and 7 analytical queries.
- Developed Flask-based REST API exposing database operations and role-based frontend for User and Coach dashboards.
- Integrated OpenWeatherMap API to fetch real-time weather and generate context-aware daily fitness recommendations.

ACHIEVEMENTS & LEADERSHIP

TFWS Recipient + University Merit Scholarship: Awarded for academic excellence throughout B.Tech.

Competitive Programming: Solved 500+ problems on Leetcode and Codeforces

Student Mentorship: Invited by my school to deliver a presentation on Board exams, GUJCET, and JEE preparation strategies for junior students.

TECHNICAL SKILLS

Languages: Java, C, Python, JavaScript, TypeScript, Verilog HDL, Solidity, Oracle SQL

Libraries: NumPy, Pandas, Matplotlib, Scikit-learn, OpenCV, NLTK

Frameworks/Tools: Git/GitHub, VS Code, React, Tailwind CSS, Node.js, Hardhat, IPFS, Firebase
