EDUCATION

Ahmedabad University

Aug 2023 – May 2027

B.Tech in Computer Science and Engineering (CGPA: 3.75 / 4.00)

Ahmedabad, Gujarat

– **Coursework:** Computer Networks, Operating Systems, Data Structures, Design and Analysis of Algorithms

Gujarat Secondary & Higher Secondary Education Board (GSEB)

May 2023

HSC (Science) – 91.84% (*District Topper*)

Gujarat

WORK EXPERIENCE

LLM Engineering Intern

Jun 2026 – Present

Blink Analytics

- Configured PostHog data pipelines with GCP BigQuery and developed HogQL/SQL analytics queries for interview performance and user behavior insights.
- Built zero-shot embedding based prototypes for classifying interview issues and feedback using cosine similarity, reducing dependence on LLM API calls.
- Built a job-candidate recommendation engine using ESCO/O*NET ontology matching, hard filters, and interview performance integration.

Teaching Assistant – Digital Logic & HDL

Aug 2025 – Nov 2025

Ahmedabad University

- Conducted 12 weekly lab sessions on combinational and sequential circuit design using Logisim and Verilog HDL.
- Resolved in-class doubts regarding K-maps, Boolean algebra, and FSM design and evaluated weekly lab reports.

Web Development Intern

Jun 2025 – Jul 2025

MICA University

Ahmedabad, Gujarat

- Developed an interactive web-based simulation platform for students prompt evaluation through professor dashboard.
- Implemented real-time multi-user synchronization using Firebase Firestore and structured evaluation workflows.

PROJECTS

Dynamo-lite — Distributed Key-Value Store | *Java, TCP Sockets, Hashing*

May 2026 – Jul 2026

- Built a fault-tolerant distributed key-value store from scratch in Java with raw TCP sockets, implementing consistent hashing (MD5, 150 virtual nodes) across a real 3-node LAN cluster.
- Engineered quorum replication (N=3, W=2, R=2) with parallel fanout via ExecutorService, heartbeat-based failure detection (<5s), and hinted handoff for zero-downtime writes during node failures.
- Demonstrated CAP theorem AP behaviour — system sustains reads and writes with 1-of-3 nodes down, auto-recovering consistency via hinted handoff on node revival.

Real World Asset Tokenization using Blockchain | *Solidity, ERC-721, IPFS*

Feb 2026 – Mar 2026

- Built an Ethereum-based NFT framework with role-based access control and immutable on-chain ownership records to prevent unauthorized asset transfers.
- Integrated IPFS for tamper-evident storage and implemented MetaMask-based cryptographic authentication.

Planetary Exploration Rover – Hybrid AI Navigation | *Python, A*, Heuristics*

Aug 2025 – Nov 2025

- Designed a hybrid AI architecture combining reactive hazard avoidance with deliberative A* planning for goal-driven navigation.
- Implemented heuristic optimization (Manhattan, Chebyshev, Weighted Euclidean) and memory-based loop prevention.

ACHIEVEMENTS & LEADERSHIP

Linux Essentials (Cisco Networking Academy): CLI-based system administration, file/user management, networking.

TFWS Recipient + University Merit Scholarship: Awarded for academic excellence throughout B.Tech.

Competitive Programming: Solved 500+ problems on Leetcode and Codeforces, Max Rated 1681

Student Mentorship: Invited by my school to deliver a presentation on Board exams, GUJCET, and JEE preparation strategies for junior students.

TECHNICAL SKILLS

Languages: Java, C, Python, SQL (Oracle, BigQuery, HogQL), Solidity, Verilog HDL, LaTeX

Libraries: NumPy, Pandas, Matplotlib, Scikit-learn, OpenCV, NLTK

Tools/Frameworks: Git/GitHub, VS Code, Firebase, PostHog, Google BigQuery, Google ADK
